PROJECTS

Tweet Catcher   September 2020
An Application that allows users to search tweets by hashtag using the Twitter API. Users can assign tweets to categories and view each category and assigned tweets.
Stack: Javascript, Node, Express, MongoDB, Mongoose, EJS, Bootstrap, CSS, HTML

Toronto City Guide   June 2020
An app that allows travelers to find accommodations, restaurants, groceries, etc. nearby. Can also create a itinerary and schedule for the trip. Also has messaging feature that allows users to share their plans with their contacts.
Stack: React, Node, Express, MongoDB, Mongoose, MaterialUI, Socket.io

Foodsur   April 2020
A progressive web application that allows users to scan a product's code and see if it meets the user's set dietary restrictions. Also allows users to save favourites and see items that others with identical restrictions have favourited.
Stack: React, Node, Express, PostgreSQL, Sequelize, HTML, CSS, Material UI

Jungle   April 2020
Worked on a existing repository to build out new features including authentication, admin dashboard and dynamic components.
Stack: Ruby, Rails, PostgreSQL, Active Record, HTML, CSS

Scheduler   March 2020
A React application that allows users to book interviews within a set time period each day and select the interviewer. Also allows users to edit and delete their appointments.
Stack: React, Express.js. Node.js, SASS, HTML, CSS

Full Cycle   March 2020
An application that allows users to log in and list bikes for sale. Bikes can be filtered by various criteria. Administrator accounts exist that allow listed bikes to be listed as sold or deleted from the database.
Stack: Javascript, Jquery, Express, Node, PostgreSQL, HTML, CSS, Bootstrap

WORK EXPERIENCE

Field Service Technician, HealthHUB   2016-2020
- Worked with diverse teams on special projects and site audits to ensure system optimization, developing strong project management skills.
- Resolved network and technical issues relating to TV, IBT terminals and telephone services.

Teaching Assistant, York University   2014-2017
- Researched and prepared course material used in tutorials including preparing cogent summaries of topics outside of my field of study for a general education course.
- Developed strong leadership skills while conveying course material to students, ensuring that students achieve complete and accurate understanding of complex issues.

Dairy Manager, Food Basics   2013-2014
- Met variable sales requirements through managing inventory, ordering stock, and assessing product quality. Worked with management and retail partners to Identify sales trends, execute merchandising plans, and reduce department shrink.
- Defined expectations and responsibilities for a team of ten full and part-time employees.
